

NESPELEM VALLEY ELECTRIC

CO-OP, INC.

RATE SCHEDULE LSL

NEW LARGE SINGLE LOAD

Service Character: Three phase, 60 cycle, served at a voltage available and approved by Nespelem Valley Electric Cooperative, Inc. (NVEC)

Applicable: Load associated with a new facility or expansion of an existing facility. This rate applies to customers that would have an additional electrical system demand of one (1) megawatt (MW) that would include ancillary load if any (e.g. river pump station plus booster pumps = 1 MW) or more in any calendar month.

Non-Recurring and Monthly Charges: New customer loads of one (1) megawatt (MW) or more in any calendar month of a year will require a customized power sale contract between the customer and NVEC prior to NVEC being obligated to provide electrical service to the customer. The customer must provide NVEC with a detailed and verifiable estimate of the customer's electrical power requirements prior to the development of a power sales contract.

The power sales contract shall identify special circumstances, terms, rates and other conditions as required to serve the customer.
